Registered Charity No. 1133490

## SPRING NEWSLETTER APRIL/MAY 2016

### News from Dodoma

*"We thank God that our Friday night prayers bring over 100 people every week to pray, from children to the elderly. Also in early morning prayers (very early!) we average 80-100 people coming. So our Church is growing and members bring new people to Jesus regularly. We are seeing a new revival."*

With growth comes spiritual opposition, so please continue to pray for the Tanzanian Church, especially their Pastors Samson and Zephaniah.

### Other News

A nursing team of 8 are going out to Dodoma next month. This is to visit the chronically sick in the community, teach the health volunteer team Tazama na Tunza and continue to build partnership with the Tanzanian Church. The Dodoma Church believes that mission and health care go hand in hand, and so we are an expression of God's love to their community.

The Health Centre is being built steadily as the money comes in. When we come back from our visit we will show you more photos. We are now at a stage to prepare for putting the roof on and so are praying for the money to come in to pay for this.

### This October

We are inviting Pastor Zephaniah, Samson's wife Margaret and Dr Motto (who oversees the medical work) to visit the UK from 14-31st October. Pray that they will all get their visas to come. The aim of the visit is to continue to build partnership with the Tanzanian Church, for them to continue to teach us about the wonder and power of prayer and the importance of the Medical Centre that we are building together in Dodoma.

***If you would like our Tanzanian visitors to visit your Church, please email or ring Ruth: [ruthchorley@hotmail.com](mailto:ruthchorley@hotmail.com) / 07584688373***

### Fundraiser

We are looking for a volunteer Fund Raiser for 6-12 months: please contact Ruth as above if you are interested.

### Rehema's Story

Rehema is one of the health team volunteers. She also has HIV. When she started to work with the team 2 years ago, she was not at all well and was very hesitant about sharing her diagnosis but was passionate about helping other people with HIV. She was abandoned by her husband and left to care for her 3 children with no support. As she grew both as a Christian and with health awareness, she also started a small business trying to sell some fruit and vegetables to raise money for herself, her children and others to live on. The Church's medical work has been both supporting her and her vision to help others.
